## SUPERTRAINING

## Sixth Edition-Expanded Version

## Yuri Verkhoshansky Mel C. Siff

## CONTENTS

| Ack  | nowledgementsi  |
|------|---|
| 1.   | STRENGTH AND THE MUSCULAR SYSTEM  |
|      | What is Strength?   |
|      | The Origins of Strength Training Science  |
|      | Pioneers of Strength Training   |
|      | The Divergence of Training Philosophies   |
|      | The Modern Era Dawns  |
|      | The Fundamental Principle of Strength Training<br>Neural Changes with Training                                |
|      | Strength Deficit  |
| 11   | Preliminary Issues  |
| 1.1  | V V   |
|      | 1.1.1 Resistance Training for Different Purposes  |
|      | 1.1.2 Factors limiting Strength Production  |
|      | Trainability<br>Neuromuscular Efficiency Biomechanical Efficiency Psychological Factors Pain and Fear of Pain |
|      | Injury and Fear of Injury Fatigue   |
| 1 2  | Fundamental Biomechanics of Strength  |
| 1.4  | Biomechanics and Training Initial Implications of Mechanics Mass and Acceleration Issues                      |
|      | Muscle Tension and Training Stimulus Application of Basic Biomechanics  |
| 1.3  |   |
|      | A Philosophy of Physical Training   |
| 1.4  | Specificity in Training   |
| 1.5  | Strength and Fitness  |
|      | Fitness, Preparedness and Work Capacity   |
| 1.6  | The Nature of Strength  |
|      | Determinants of Strength Shock Training and Plyometrics Strength and Connective Tissue                        |
| 1.7  | The Muscle Complex  |
|      | 1.7.1 The Structure of Muscle   |
|      | Further Muscle Research   |
|      | 1.7.2 A Model of the Muscle Complex40   |
|      | Further Information on Collagenous Tissues  |
|      | The Structure and Function of Ligaments and Tendons   |
|      | Mechanical Loading of Collagenous Tissue  |
|      | The Role of Stored Elastic Energy   |
|      | The Influence of Exercise on Connective Tissue  |
|      | A Modified Muscle Model   |
|      | 1.7.3 Implications of the Muscle Model for Flexibility  |
| 1.0  | 1.7.4 The Relationship between Stability and Mobility   |
| 1.8  | Classification of Muscle Actions  |
| 1.9  | Cocontraction and Ballistic Movement50  |
| 1.10 | Types of Muscle Action51  |
|      | Quasi-isometric Action  |
| 1.11 | The Triphasic Nature of Muscle Action54   |

| 1.12 | Types of Muscle Fibre  | 55  |
|------|--|-----|
|      | Slow and Fast Twitch Muscle Fibres   |     |
|      | Muscle Protein Isoforms  |     |
|      | Muscle Fibres and Training   |     |
|      | Further Aspects of Muscle Plasticity   |     |
|      | The Implications of Ballistic Research   |     |
| 1.13 | The Mechanism of Muscle Growth   | 65  |
|      | The Effects of High versus Moderate Intensity Exercise                             | (0) |
|      | Neurophysiological Aspects of Exercise   |     |
| 1.15 | Bioenergetics and the Energy Systems   |     |
|      | 1.15.1 The Energy Systems and Types of Activity                                    |     |
|      | 1.15.2 Energy Mechanisms   |     |
|      | 1.15.3 The Short-Term Energy System  |     |
|      | 1.15.4 The Intermediate Energy System  |     |
|      | 1.15.5 The Long-Term Energy System   |     |
|      | 1.15.6 Implications for Physical Conditioning                                      |     |
|      | 1.15.7 Hormonal Factors and Strength Training                                      |     |
| 1.16 | Adaptation and the Training Effect   | 82  |
|      | The Effects of Stress  |     |
|      | 1.16.1 The General Adaptation Syndrome   | 83  |
|      | Adaptive Reconstruction versus Supercompensation                                   |     |
|      | 1.16.2 The Biochemistry of Adaptation in Sport                                     |     |
|      | The Specificity of Biochemical Adaptation  |     |
|      | The Sequence of Biochemical Changes during Training                                | 07  |
|      | 1.16.3 General Theories of the Training Process<br>Single-Factor Model of Training |     |
|      | Two-Factor Model of Training   |     |
|      | The Concept of Progressive Overload Training                                       |     |
|      | 1.16.4 A Model of Physical Fitness   |     |
| 2.   | SPORT SPECIFIC STRENGTH TRAINING   |     |
|      | Special Strength Training  |     |
|      | The Russian System of Classifying Athletes   |     |
|      | The Early Stages of Strength Training  |     |
| 2.1  | Schemes for Perfecting Movements   | 97  |
|      | 2.1.1 Increasing the Working-Effect of Movements                                   |     |
|      | 2.1.2 Perfecting the Motor Structure of Sports Movements                           |     |
|      | The Kinematic Pair   |     |
|      | The Kinematic Chain  |     |
|      | The Kinematic System   |     |
|      | 2.1.3 Perfecting the Kinesiological Pattern of Movements                           |     |
| 2.2  | Specialisation to Develop Sports Mastery   |     |
|      | 2.2.1 Specific Forms of Producing Muscular Strength                                |     |
|      | 2.2.2 Sports Implications of Strength Indices                                      | 109 |
|      | 2.2.3 The Functional Topography of the Muscular System                             |     |
|      | 2.2.4 Motor Specialisation in Developing Sports Mastery                            |     |
|      | Heterochronicity   |     |
|      | Specialisation Processes   |     |

| 2.3 | Characteristics of Physical Fitness  | 116   |
|-----|--|-------|
|     | 2.3.1 The Structure of Physical Fitness  |       |
|     | 2.3.2 The Interrelation between Motor Abilities  |       |
|     | General and Partial Connections  |       |
|     | Essential and Non-essential Connections  |       |
|     | Positive and Negative Connections  |       |
|     | Direct and Indirect Connections  | 100   |
|     | 2.3.3 The Structure of Motor Abilities.  |       |
| 2   | 2.3.4 General Concepts of the Structure of Physical Fitness  |       |
| 3.  | FACTORS INFLUENCING STRENGTH PRODUCTION  |       |
| 3.1 | The Regimes of Muscular Work   |       |
| 3.2 | Qualitative Characteristics of Strength  |       |
|     | 3.2.1 Explosive Strength   | .129  |
|     | Quickness and Reactive Ability   |       |
|     | Speed, Speed-Strength and Quickness  | 1 4 0 |
| 2.2 | 3.2.2 Strength-Endurance.  |       |
| 3.3 | The Influence of External Conditions on Strength   |       |
|     | 3.3.1 The Influence of the Pre-working State of the Muscles  |       |
|     | 3.3.2 The Effect of the Load on Speed of Muscle Contraction  | 146   |
|     | Contraction Speed and Strength in Acyclic Activity<br>Limitations of the Force-Velocity Relationship |       |
|     | Contraction Strength and Speed in Cyclic Activities  |       |
|     | 3.3.3 The Effect of Strength on Speed of Muscle Action   | 149   |
|     | Speed-Strength and Strength-Speed  | .17)  |
|     | The Interrelation between Strength and Other Fitness Factors   |       |
|     | 3.3.4 The Relationship between Strength and Posture  | 152   |
|     | 3.3.4.1 Strength Variation with Postural Change  |       |
|     | 3.3.4.2 Strength, Safety and Pelvic Tilt   |       |
|     | 3.3.4.3 The Effect of Head Position on Strength  | .154  |
|     | 3.3.4.4 Strength, Symmetry and Limb Alignment  |       |
|     | 3.3.5 The Dependence of Strength on Bodymass   | .155  |
|     | 3.3.6 The Relationship between Strength and Height   | .159  |
|     | 3.3.7 The Relationship between Strength and Age  | .159  |
|     | 3.3.8 The Relationship between Strength and Gender   | .161  |
|     | 3.3.9 The Increase in Human Strength over Time   | .161  |
| 3.4 | Factors increasing the Working Effect of Strength  | 162   |
|     | 3.4.1 The Warm-up and Pre-Activity Preparation   | 162   |
|     | 3.4.2 The After-effect of Muscle Activity  | 164   |
|     | 3.4.3 Additional Movement  | .166  |
|     | 3.4.4 Preparatory Movement   |       |
|     | 3.4.5 Coordination in Muscular Work  |       |
|     | 3.4.6 Efficiency of Energy Expenditure   |       |
|     | 3.4.7 Emotion and other Psychological Factors  |       |
|     | 3.4.8 The Effect of Cold Application   |       |
|     | 3.4.9 Breathing and Strength Production  |       |
|     | 3.4.10 Strength Development and Proprioception   |       |
| 3.5 | Flexibility and Sporting Performance   |       |
|     | 3.5.1 A Definition of Flexibility  |       |
|     | 3.5.2 The Effects of Stretching  |       |
|     | 3.5.3 The Neuromuscular Component of Flexibility   |       |
|     | 3.5.4 Components of Joint Flexibility  | 179   |

| 3.5.5 Parameters of Flexibility   | 179 |
|---|-----|
| 3.5.6 Soft Tissue Biomechanics and Flexibility  |     |
| Flexibility, Stability and Muscle Activity  |     |
| 3.5.7 The Influence of Exercise on Connective Tissue  | 182 |
| 3.5.8 Stretching Techniques   | 183 |
| The Use of Ballistic Stretching   |     |
| 3.5.9 Low Flexibility versus Non-Functional Muscle Tension  | 187 |
| 3.6 The Stretching Matrix System  |     |
| Is Stretching Always Necessary?   |     |
| 3.7 The Movement Matrix System  | 193 |
| Limitations of Anatomical Movement Analysis   |     |
| 4. THE MEANS OF SPECIAL STRENGTH TRAINING   | 201 |
| 4.1 The Problem of Training Means   | 201 |
| 4.1.1 Characteristics of Strength Increase  |     |
| 4.1.2 The Effect of Strength Training Means   |     |
| Algebraic Relations and Training  |     |
| Steps Towards Structuring the Training Process  |     |
| 4.2 Different Means of Strength Development   |     |
| 4.2.1 Electrostimulation.   |     |
| 4.2.1.1 The Physiological Effects of Electrostimulation   |     |
| 4.2.1.2 Reasons for Conflicting Research  |     |
| 4.2.1.3 Clinical Applications of Electrostimulation   |     |
| 4.2.1.4 Further Research Findings   |     |
| 4.2.1.5 An Integrated Theory of Electrostimulation  |     |
| 4.2.1.6 The Use of Electrostimulation in Training   |     |
| The Integrated Use of Electrostimulation  |     |
| Sports Functional Electrostimulation  |     |
| Overtraining and Restoration  |     |
| Concluding Remarks  |     |
| 4.2.2 Resistance and Strength Training  | 216 |
| 4.2.3 Kinetic Energy and Strength Processes   |     |
| 4.2.4 Isometric Training  |     |
| Isometric Training and Angular Specificity  |     |
| Isometric Endurance   |     |
| Recovery after Isometric Activity   |     |
| Other Aspects of Isometric Activity   |     |
| Loadless Training   | 220 |
| 4.2.5 Eccentric Training.   |     |
| 4.2.6 Isokinetic and Other Training Means   |     |
| 4.2.6.1 The Isokinetic Training Method  |     |
| 4.2.6.2 Limitations of the Isokinetic Method  | 233 |
| Recommended Strength Ratios   |     |
| Functional Anatomy  |     |
| Muscle Physiology   |     |
| The Importance of Specificity   |     |
|   |     |
| Concluding Remarks  |     |
|   | 236 |
| Concluding Remarks  |     |
| Concluding Remarks<br>4.2.6.3 Static-Dynamic Methods  | 236 |
| Concluding Remarks<br>4.2.6.3 Static-Dynamic Methods<br>4.2.6.4 Choice of Muscle Training Regimes |     |

|     | 4.2.7.3 Machines and the Variable Resistance Philosophy          |     |
|-----|--|-----|
|     | 4.2.7.4 The Training Safety of Machines                          |     |
|     | 4.2.7.5 The Efficiency of Machine Training                       |     |
|     | 4.2.8 The Concept of Symmetric Training                          |     |
|     | 4.2.9 The Concept of Symmetric Training                          |     |
| 12  | Dynamic Correspondence as a Means of Strength Training           |     |
| 4.3 |  |     |
|     | 4.3.1 The Amplitude and Direction of Movement                    | 242 |
|     | Parachute Resistance Training                                    | 244 |
|     | 4.3.2 The Accentuated Region of Force Production                 |     |
|     | 4.3.3 The Dynamics of the Effort                                 |     |
|     | 4.3.4 The Rate and Time of Maximal Force Production              |     |
|     | 4.3.5 The Regime of Muscular Work                                |     |
|     | 4.3.6 Correspondence of Training Means to the Sports Movements   | 247 |
| 4.4 | Strength Training and General Endurance                          | 248 |
|     | Oxidative Capacity and Muscular Endurance                        |     |
|     | Strength Training and General Endurance                          |     |
|     | The Process of Functional Specialisation                         |     |
|     | Factor Analysis  |     |
| 5.  | THE METHODS OF SPECIAL STRENGTH TRAINING                         |     |
| 5.1 | The Problem of Methods   |     |
|     | Some Implications of the Laws of Dynamics                        |     |
| 5.2 | General Principles of Special Strength Training                  | 257 |
|     | 5.2.1 The Development of Maximum Strength                        |     |
|     | The Repetitive Effort Method                                     | 230 |
|     | The Brief Maximal Tension Method                                 |     |
|     | 5.2.2 Autoregulating Progressive Resistance Exercise (APRE)      | 261 |
|     | 5.2.3 The Development of Speed-Strength                          |     |
|     | 5.2.4 The Development of Explosive Strength and Reactive Ability |     |
|     | The Plyometric Method  | 207 |
|     | Plyometrics as a Discrete Training System                        |     |
|     | Plyometric Training and Safety                                   |     |
|     | The Fundamental Theory of Plyometrics                            |     |
|     | The Prescription of Plyometric Exercise                          |     |
|     | Asymmetric Plyometrics   |     |
|     | Non-Impact Plyometrics   |     |
|     | Non-Impact Plyometrics in Sports Training                        |     |
|     | Resisted and Water Plyometric Training                           |     |
|     | Analysis of Popular Texts on Plyometrics                         |     |
|     | Plyometrics and the Brain  |     |
|     | Various Shock Methods  |     |
|     | 5.2.5 The Development of Strength-Endurance                      |     |
| 5.3 | Application of Special Strength Training Means                   |     |
|     | 5.3.1 Interaction between Different Training Means               |     |
|     | 5.3.2 A Sequential System of Training Means                      |     |
|     | 5.3.3 The Conjugate Sequence System of Training Means            |     |
| 54  | The Principal Aims of Special Strength Training                  |     |
| 5.4 | 5.4.1 Converging the Partial Effects of Strength Training Means  |     |
|     |  |     |
|     |  |     |
|     | 5.4.3 Specific Correspondence of The Training Effect             |     |
|     | 5.4.4 Maintaining the Strength Training Effect                   |     |
| 5.5 | Cross Training in Sport  |     |
| 5.6 | Circuit Training   |     |

| 6.   | ORGANISATION OF TRAINING                               |     |
|------|--|-----|
| 6.1  | The Development of Training Organisation               |     |
|      | Ways of Organising Training                            |     |
| 6.2  | Periodisation as a Form of Organisation                |     |
|      | Definitions and Fundamental Concepts                   |     |
|      | Preparatory Phases of Training                         |     |
|      | Further Phases and Principles                          |     |
|      | Acquisition and Stabilisation of Technical Skills      |     |
|      | 6.2.1 Types of Periodisation                           |     |
|      | 6.2.2 Calculation of the Parameters of Periodisation   |     |
|      | Drawing up the Periodisation Scheme                    |     |
|      | Cybernetic Programming and Periodisation               |     |
|      | Training Intensity, Heart Rate and Other Tests         |     |
|      | Non Technological Testing                              |     |
|      | 6.2.3 The Relationship between Intensity and Volume    |     |
| 6.3  | The Periodisation Controversy                          |     |
|      | Chronobiology and Periodisation                        |     |
| 6.4  | Training as an Objective of Management                 |     |
| 6.5  | Prerequisites for Organising Training                  |     |
| 6.6  | Basic Management Theory                                |     |
| 0.0  | 6.6.1 Human Needs and Motivation                       |     |
|      | Maslow's Hierarchy of Needs                            |     |
|      | Other Theories of Needs                                |     |
|      | Expectancy Theory of Motivation                        |     |
|      | 6.6.2 Management Models                                |     |
|      | The Traditional Model                                  |     |
|      | The Managerial Grid                                    |     |
